## **Statistical Summary**

**FY 2015 Community Corrections Offender Population** 

# KANSAS DEPARTMENT OF CORRECTIONS COMMUNITY CORRECTIONS DIVISION

A safer Kansas through effective community collaboration and correctional practices

**JULY 2015** 

#### **Preface**

This report provides a detailed statistical summary of adult offenders under the Kansas community corrections system during fiscal year 2015. The report is based on data pulled from the Total Offender Activity Documentation System (TOADS). The number of offenders for whom information is available varies across data items. The data may differ from other reports published by the Kansas Department of Corrections and the Kansas Sentencing Commission because this report reflects information for community corrections offenders only; captures different data elements; and is captured at different points in time. Each set of data is prefaced with a short description of content.

## Fiscal Year 2015 Community Corrections Statistical Summary Data Index

Page	1	Title Page	
Page	2	Preface	
Page	3	Index	
Pages	4 - 7	Section I:	Average Daily Population
Pages	8 - 9	Section II:	Number and Percentage of Community Corrections Offender Files Closed by Agency and Closure Type
Pages	10 - 26	Section III:	Number and Percentage of Community Corrections Offenders Files Closed by Type for Fiscal Years 2010 - 2015
Pages	27 - 28	Section IV:	Number and Percentage of Departures by Agency
Pages	29 - 31	Section V:	Number of Community Corrections Offenders with an LSI-R Score: Termination Reason by Risk Level

#### **SECTION I: Average Daily Population for FY 2015**

The first section of data consists of the average daily population (ADP) for the community corrections offender population. There are three types of ADP included:

Top Number: ADP average for that particular month.

YTD ADP: ADP averaged from the time the fiscal year started (the top number and this number

will always be the same for July of each year since it's the first month).

Example: For September 2014 numbers, the number will be the average for July, August,

& September.

12mo ADP: ADP averaged over the last 12 months. Example: June 2015 numbers, it looks at the

ADP from July 2014 – June 2015 (12 months). The last month of each fiscal year (June)

will always be the same as the YTD ADP (since June is the 12th month).

#### **FY 2015 ADP (YTD & 12MO)**

## SECTION II: Number Community Corrections Offender Files Closed in FY 2015 by Agency and Closure Type

The data in Section II is a one page snap-shot of how offender files closed in fiscal year 2015. Information was pulled from the agency's individual Court Case Sentencing Activity Reports which were run starting on 7/15/15 at 12:55:17 PM, and concluded on 7/16/2015 at 8:57:32 AM. The statewide total numbers were pulled from the statewide Court Case Sentencing Activity Report, which was run on 7/15/2015 at 9:51:36 AM.

A number of closure types are included in the group of successfully closed cases. In addition to cases that were successfully closed, cases that were terminated due to the offender's death, the offender not being sentenced to community corrections, and cases that were unsuccessfully closed for any reason (closed by court, remanded to jail, etc.) were classified as successfully closed.

You may notice that if you sum up all the agencies they will not equal the statewide total. This is because looking at the data from the agency perspective, offender have the possibility of having more than one file in the state during that particular time frame, as an offender may have a closed case in more than one community correction agency. An offender is counted once per agency, but can be in more than one agency's total—in data terms, the offender can be duplicated. The statewide summary and totals, however, the actual offender is only counted once regardless of how many agencies in which the offender had closed cases—in data terms the offender is unduplicated.

## Section III: Number and Percentage of Community Corrections Offender Files Closed by Type Fiscal Years 2010 – 2015

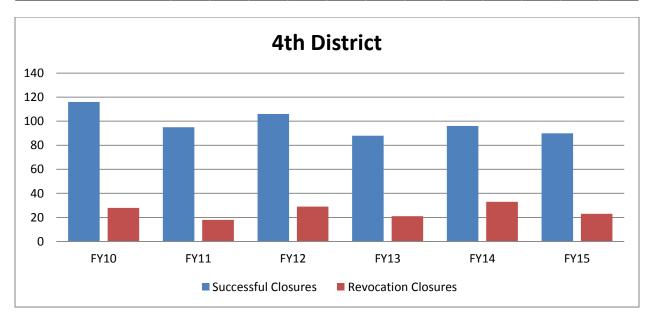

The data in the bar chart shows the number of offender files by termination reason for fiscal years 2010 through 2015 for each agency and statewide. The table below the bar chart offers the number and percentage of cases which were closed by reason for fiscal years 2010 through 2015.

A number of closure types are included in the group of successfully closed cases. In addition to cases that were successfully closed, cases that were terminated due to the offender's death, the offender not being sentenced to community corrections, and cases that were unsuccessfully closed for any reason (closed by court, remanded to jail, etc.) were classified as successfully closed. The group measuring revocation terminations is comprised of cases that were revoked due to a new misdemeanor, cases revoked due to condition violations, and cases revoked due to a new misdemeanor.

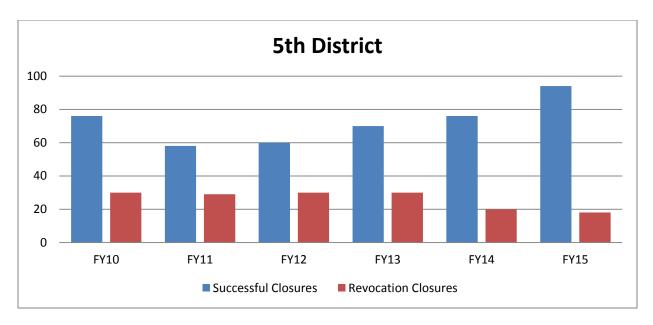

All information for Section III was pulled from the agency's individual Court Case Sentencing Activity Reports which were run starting on 7/15/15 at 12:55:17 PM, and concluded on 7/16/2015 at 8:57:32 AM. The statewide total numbers were pulled from the statewide Court Case Sentencing Activity Report, which was run on 7/15/2015 at 9:51:36 AM.

#### SECTION IV: Number and Percentage of Departures by Agency and Statewide for FY15

Data was pulled from the Court Case Departures Report (export to Excel) within TOADS for FY15 only. Please note that a departure may be counted more than once due to multiple departure types. There are several departure types but only the four most utilized departure types are included (as the report does not make a distinction between a Double Downward; Double Upward; or Up & Down departure).

The sentencing court may depart upward to increase the <u>length of a sentence</u> up to double the duration (**Upward Durational Departure**) within the sentencing grid block.

The court may also depart downward to lower the duration of a presumptive sentence (**Downward Durational**).

The sentencing court may depart upward to increase the <u>type of supervision</u> from probation to prison (**Upward Dispositional**)

The sentencing court may also depart downward to decrease the type of supervision from prison to probation (**Downward Dispositional**).

\*A more in-depth explanation of departure types is available by request if needed.

### SECTION V: Number of Community Corrections Offenders with an LSI-R Score: Termination Reason by Risk Level

This is a quick snapshot of the number of offenders LSI-R risk level by termination reason for all agencies and statewide during fiscal year 2015. The second page is the percentage of offenders LSI-R risk level by termination reason. Numbers were pulled from the agency's individual Court Case Sentencing Activity Reports which were run starting on 7/15/15 at 12:55:17 PM, and concluded on 7/16/2015 at 8:57:32 AM, and matched with numbers from the TOADS-Assessment file (assessment conducted closest to discharge), which was pulled on 7/12/2015 at 2:51 PM. There will be several offenders who did not have an LSI-R supervision level. Also, offenders who were Not Sentenced to Community Corrections or who Died were not included in the LSI-R risk level data.

As stated for Section II, you may notice that if you sum up all the agencies they will not equal the statewide total. This is because looking at the data from the agency perspective, offender have the possibility of having more than one file in the state during that particular time frame, as an offender may have a closed case in more than one community correction agency. An offender is counted once per agency, but can be in more than one agency's total—in data terms, the offender can be duplicated. The statewide summary and totals, however, the actual offender is only counted once regardless of how many agencies in which the offender had closed cases—in data terms the offender is unduplicated.
