RePath Wellness:

A Transformative Approach to Community Corrections

Product Overview:

RePath Wellness, a groundbreaking partnership between eHawk's RePath and Breaking Free, addresses arrest and recidivism by tackling substance abuse. This 24/7 platform delivers Cognitive Behavioral Therapy at scale, providing individuals with Substance Use Disorders (SUDs). It fills the capacity gaps in existing substance abuse programs.

Proven Results:

- 60% improvement in rehabilitation
- 30% reduction in substance dependency
- Improved mental health

Benefits:

• For Participants:

- Overcome barriers such as shame, stigma, lack of access to in-person treatment, and logistical constraints.
- Strengthen rehabilitation through relapse prevention, improved thinking skills, and emotional regulation.
- Receive continuous care throughout all stages of criminal justice.

• For Supervising Officers, Case Managers, and Practitioners:

- Engage and support more participants by giving them 24/7 access to personalized Cognitive Behavioral Therapy.
- Strengthen engagement by delivering RePath Wellness one-to-one or in group settings, using a manualized approach.
- Use progress reports to inform sentence planning and evidence engagement, treatment compliance, and overall progress.

For Agencies:

- Respond proactively to the opioid crisis and the high prevalence of SUDs with a scalable, consistent, evidence-based digital solution.
- Monitor engagement and positive impact for participants in real-time via an online dashboard.
- Strengthen the provision of rehabilitative support, actively addressing the core issue of SUDs and breaking the links between substance use and related offenses.

Breaking Free Companion App

Provides geofencing to help supervises mitigate risks in the community

Breaking Free Outcomes Dashboard

Allows agencies to monitor program engagement and outcomes in real-time

Breaking Free Treatment Manuals

Facilitates delivery of Computer-Assisted Therapy, one-to-one, or as a group intervention
