

Sexual Offender Treatment Program

Referral Process for Juvenile Sex Offender Evaluations and Treatment

All referrals for juvenile sex offender evaluations and treatment will be made through the Clinical Associates office in Lenexa, KS. Referral sources (probation/court services officers, attorneys, parents) should call the main number (913) 677-3553 and press option 6. That will direct the caller to the Program Manager, Jaime Faulkenberry. Her email address is jaime@clinical-assoc.com. She can be reached by fax at (913) 677-3282.

Clinical Associates requires a psychosexual evaluation be conducted on all youth prior to entrance into treatment. In most cases, CA will conduct the evaluation, however, there may be times when an evaluation has been completed by another provider. The referral source will need to furnish a copy of that evaluation and CA will determine whether or not a new evaluation is needed prior to placement in treatment.

The referral source should provide CA with the following information at time of referral:

- Youth Name and DOB
- Medicaid number
- Current address/placement of the youth
- Probation/court services officer name and contact info
- Sex offender case information
 - Current status of the case (pre-adjudication, post-adjudication/pre-disposition, post-disposition). This is important because the contract requires that if youth are to be served under this contract, they must be adjudicated of a sexually motivated offense.
 - What they youth was charged with, what he/she was adjudicated of, what the sentence is
 - Next court date and reason for court (e.g. status hearing, disposition, etc.)
- All available court records (e.g. police reports, affidavit, victim statements, other psychological records, etc.)

Once the referral has been made, Jaime will coordinate services with available providers. Jaime will respond to all inquiries within 24 hours and the evaluation will be scheduled as soon as possible. CA will conduct all evaluations (to include the completed report) within 30 days of referral. That report will contain recommendations regarding treatment needs.

Following the psychosexual evaluation, the referral source will determine whether or not to refer the youth for treatment. All referrals for treatment will be made through Jaime, and consistent with the process above. Jaime will coordinate with the Clinical Supervisors, Kim Kosmala, LCP in the Northern Region and Keelee Hockett, LCMFT in the Southern Region. Kim and Keelee will be responsible for placement of youth in treatment and will coordinate services with the referral source. Kim and Keelee will review the recommendations of the psychosexual evaluation and work with the supervising officer/parents/YRC-II staff to set up treatment.
