**Resident Death at Hutchinson Correction Facility**

TOPEKA, Kansas – A Hutchinson Correctional Facility resident who died Thursday, October 29 had tested positive for COVID-19. This is the second COVID-19 related resident death at HCF, and the eighth resident death related to COVID-19 for the department.

The resident tested positive for the virus on Oct. 16 and was transferred to the hospital on Oct. 19. He was a 50-year old asian or pacific islander male with underlying medical concerns that contributed to his condition.

The resident was serving a 195-month sentence for aggravated criminal sodomy. He had been imprisoned with the Kansas Department of Corrections (KDOC) since September 2015.

The Hutchinson Correctional Facility is Kansas' second-oldest prison and houses 1,884 men. Formerly known as the Kansas State Industrial Reformatory, the facility has three buildings including the Central (all custody levels), East (low-medium custody) and South (minimum) units.

For current information on COVID-19 in Kansas, and to sign up for updates, go to the KDHE COVID-19 Resource Center at [kdhe.ks.gov/coronavirus](https://kdhe.ks.gov/coronavirus). For information on the KDOC's response to COVID-19, visit <https://www.doc.ks.gov/kdoc-coronavirus-updates>.
